AT THE COUNTY SEAT

Additional Registration Districts and Agents Appointed.

OLD PHIL ALLEN PLEADS

His Trial Next Month—Deer Lodge Will Celebrate the Fourth—The Report of Sheriff Fitzpatrick—Notes.

Special Correspondence of the Standard.
Deer Lodge, June 6.—The board of commissioners before adjournment yesterday divided the county into registration districts and appointed registry agents in each district. The number of districts were increased from five to 11 on account of the short space of time allowed under the law to complete the work of registration in each district. The registration of voters will commence this year on the 13th day of October and end on the 27th of October, thus allowing but 15 days in which to do the work. The districts are made up as follows:

District No. 1, comprises Wards 1 and 2 in the city of Anaconda; W. J. Reid, registry agent.

District No. 2, Third ward, city of Anaconda; M. J. Fitzpatrick, registry agent.

District No. 3, Fourth ward, city of Anaconda; W. J. Reid, registry agent.

District No. 4, Blue-Eyed Nellie, Silver Lake, Cable and Georgetown; Peter Levensgood, registry agent.

District No. 5, Carroll, north and south; H. C. Webster, registry agent.

District No. 6, Lost Creek, Warm Springs, Stuart and Mill Creek; E. Glard, Warm Springs, registry agent.

District No. 7, Deer Lodge, north and south; and Zosel; C. K. Hardenbrook, registry agent.

District No. 8, Race Track, Garrison, Pioneer and Gold Creek; John Welton, Race Track, registry agent.

District No. 9, Elliston, Shield's store, Bald Butte, Granite Butte, Ontario; Frank Vye, Elliston, registry agent.

District No. 10, Helmsville, Avon, Blackfoot City, Washington City and Lincoln; James W. Geary, Helmsville, registry agent.

District No. 11, Ovando, Woodworth, Sunset and Colona; Robert Dixon, Ovando, registry agent.

Philip Allen, the Pioneer murderer, was arraigned in the district court yesterday afternoon and entered a plea of not guilty to the indictment charging him with having killed McGuire at Gold Creek in the year 1888. His defense will be conducted by Attorney Welling Napton and the case will not go to trial before the next term of court, which will be in July.

The habeas corpus proceedings in the case of M. J. Meeney who, it was alleged, was being imprisoned without any authority of law, was dismissed yesterday by Judge Brantly. It being shown that Meeney was discharged from custody before the hearing on the petition for the writ came up.

Deer Lodge is going to celebrate the Fourth of July on a grand scale this year. The business men have taken hold of the affair and have appointed different committees to look after the details of the work. Mayor Conley and C. D. Joslyn circulated a subscription list to defray the expenses of the celebration and met with very gratifying success, having received pledges to the amount of \$600 in less than two hours.

Dr. Herbert Halloway and wife have moved to Deer Lodge and intend making this place their home for the present. They are occupying the Woolfolk residence on First avenue.

The report of the sheriff of Deer Lodge county to the Bureau of Agriculture, Labor and Industry shows that during the year 1895 there were 217 prisoners confined in the county jail. The total number of days all were confined is 10,152, or an average confinement of 46 days for each prisoner. Out of the total number committed to jail during the year 199 were charged with misdemeanors, while only 13 were held for felonies awaiting action of the district court and five were held temporarily on the charge of insanity.

A Notable Day for Cigarette Makers.

From the New York Journal.
To-day is a notable one for the manufacturers of cigarettes all over the world, because the patent expires which, on June 2, 1879, was granted to Charles G. Emory for an improvement upon the patent of Albert H. Hook. The patent to Hook was issued from the patent office on Nov. 7, 1876. His was the first device for manufacturing cigarettes in a continuous paper rod; Emory's improvement consisted in a supporting ribbon, which prevented the paper from breaking.

The Charles G. Emory mentioned above is one of the millionaire directors of the American Tobacco company (the cigarette trust). Albert H. Hook, the genius who first thought out the cigarette making machinery, never received more than a pittance for it, and his story is one of the most pathetic in the history of mechanical inventions in the United States. It all came out in the testimony taken upon the trial of the law suit brought by the Bousack Machine company of Bousack, Va., against Henry C. Elliott of this city. The Bousack company is capitalized at \$1,000,000. Its annual royalties for the use of its cigarette making machinery, paid to it by the Cigarette Trust, its sole licensee, are \$250,000. Every one of the directors of the American Tobacco company is a millionaire, and it was the cigarette making machinery invented by Hook, perfected by Emory and exploited by Bousack that made him so.

Three years ago, when a rival corporation to manufacture cigarettes was organized in this city, it leased from Henry C. Elliott, a wealthy wholesale liquor dealer, a machine which could make cigarettes, which he owned. The Hook patent had expired but the Emory improvement was still covered by the patent issued to that inventor. The Bousack company alleged that the Elliott machine was an infringement of the Emory patent. The case was argued first before Judge E. Henry Lacombe of the United States circuit court, in this city, on Oct. 2, 1894. Judge Lacombe gave judgment for Elliott. Then the case was taken on appeal to Judge Hoyt H. Wheeler. It was while the testimony in the case was being taken before a referee in this city that the pitiful story of Albert H. Hook came to light.

Among the witnesses examined were Henry F. Newbury, an expert mechanician, who is manager of the time clock department of the Holmes Bungalow Alarm Telegraph company, and Rowland M. Sackell, of No. 530 Griggs street, Williamsburg. Newbury was the chief expert witness for the Bousack company. He

said that cigarettes were not made by machinery prior to July, 1874, and that Albert H. Hook was the first to conceive the idea of making a continuous cigarette by machinery.

"This was a most important step in advance in the manufacture of cigarettes," said Mr. Newbury. "It departed from all former plans and marked out a new and distinct plan, and one which made possible the rapid and cheap manufacture of cigarettes."

How greatly Hook's invention has cheapened the manufacture of cigarettes was told by Charles G. Emory and William H. Butler, the latter of whom is now vice president of the American Tobacco company. Mr. Emory said that before the introduction of machinery it cost from 80 cents to \$1 to make each 1,000 cigarettes. Afterward it cost "about" 10 cents per 1,000. Mr. Butler said that in the Kinney factory hand-made cigarettes cost from \$1.30 to \$1.50 per 1,000. To make them by the Hook-Emory machine cost "in the neighborhood" of 5 cents per 1,000.

A cigarette of sawdust from the floor of a designer's shop was the first made on Hook's machine, and it had been filled with sawdust because its inventor was too poor to buy tobacco with which to experiment.

Poor "old Hook" died in 1883. Just prior to his death he sold his patent to Jones, Darlington & Wright for a few hundred dollars. James Bousack offered Jones and the other owners \$3,000 for the patent. This offer was refused, and later Bousack was glad to pay \$15,000 for it. It made him one of the richest men in Virginia.

How Emperor William Is Paid.
Emperor William receives his salary quarterly in advance. The money is three counted by different functionaries at the national treasury and is afterward placed in a number of strong boxes and carried to the royal mail wagon, waiting at the door between a troop of mounted gendarmes. After the load has been placed in the vehicle the ministers of finance of the empire and of the kingdom place the seals of their respective offices upon the door and accompany the minister of the royal household in his carriage to the palace, the mail wagon with its escort of gendarmes following immediately behind. Not until the money is actually deposited in the vaults of Emperor's William's Berlin palace does the minister of the household sign the receipts, which are made out in the name of "Wilhelm Rex" and "William Imperator," respectively, one-half of the sum being derived from the treasury of the kingdom of Prussia and the other from the treasury of the German Empire.

Notice to Contractors.
Bids will be received by the undersigned for the construction of a telephone line from Red Rock, Beaverhead county, Montana, to Salmon City, Idaho. For specifications write or inquire of E. Hill or H. Lewis, Red Rock, Mont.

Going to Helena.
Take the Montana Union train leaving Anaconda at 9:05 o'clock a. m. Close connections at Garrison going and returning.

The fast trains on the Butte, Anaconda & Pacific railway make the run between Butte and Anaconda in 45 minutes. Always in the lead. Always on time. Street car tickets free.

Fine fresh candies at L. A. King's.
See, Young & Desell for plumbing and tinwork, 410 E. Park.

Notice of the Purpose of the City Council of the City of Anaconda to Create Special Improvement District No. 2.
Notice is hereby given that it is the purpose of the city council of the city of Anaconda to create special improvement district No. 2 out of the territory in said city described as follows, to-wit:

Blocks 1, 2, 3, 4, 5 and the east half of block 6 of the original townsite of the city of Anaconda.

The hearing upon the question of the creation of said improvement district will be had before the city council at its regular meeting, Monday, July 6, 1894, at 8 p. m., when any person or persons who are the owners of any part of any lot or lots within said improvement district shall have the right to appear at said meeting, either in person or by counsel, and show cause why such improvement district should not be established.

T. O'LEARY,
City Clerk City of Anaconda.

What Two Men Got.
They Went Shares in a Dr. Sanden Electric Belt and Both Are Cured.

There may be cheaper belts, but there are none as good.
When you buy an appliance to restore health you don't want a toy.

THE GREAT NUMBER OF TROUBLES FOR WHICH Electricity is beneficial when applied by Dr. Sanden's Electric Belt is only limited to the extent of the organs supported by the nerves and blood. Every organ getting its life from these functions, and that is every organ in the human body, can be made well by this wonderful belt.

They Were Partners.
SILVER STAR, Mont., May 17, 1904.
DR. A. T. SANDEN—Dear Sir: I received your Electric Belt on February 9th last and wore it for two to three hours every night for about two months, and have not had any of the old rheumatic pains since, and wake up in the morning after a refreshing sleep feeling good. My partner, Henry Maun, wore the Belt for vital weakness and indigestion, and feels to-day that your Belt has cured him of these complaints. I shall recommend it to all who are suffering from the above complaints. The \$20 we paid for your Belt was not a penny for nothing. I would not sell it for twice the amount if I could not get another. Yours respectfully,
JULIUS ZAHN.

Can drugs show any such record? Do you want any better evidence of the faithful work of this new world-famous Electric Belt? No weak or sick person does himself justice while he does without it.

Book, with full information and price list, also many other testimonials, free, sent by mail.

SANDEN ELECTRIC CO.,
